

### Monitor compliance controls with alerts tied to violations

Receive a FREE Dataphy Compliance Assessment Report (CAR) to identify the violations against your corporate policies or governance requirements.

Compliance controls are mandatory for the basic operations of an organization to function optimally and securely. When policies and enforcements are overlooked or are overwhelmed, security tools are needed to visualize aspects of the business that cause high-risk behaviors. Deploy Dataphy's Compliance Assessment Report to identify areas of violations and threats.

- Compliance controls are effective when a monitoring solution is in place
- Generate compliance reports to evaluate the current posture of your security controls
- Enable real-time detection from where it counts the most – the data!

### Patented Adaptive Risk Analytics Engine

Dataphy's Compliance Assessment Report correlates all your assets, escalated privileges, applications, users, and database objects to give you an overview of your organization's security controls. Security analysts and auditors (both internal and external) can utilize our report to prioritize a plan of attack and to update weak controls. Our patented technology is non-intrusive and we can formulate a behavioral pattern well before any hackers can exercise their means to exfiltrate your sensitive data. Run our scan and immediately see where your biggest threats are located!

### About Dataphy

Founded in 2015 in San Jose, CA, the Dataphy solution assigns a risk score to every piece of sensitive data within an organization. The key technology is its Adaptive Data Behavioral Model™ (also called DatiDNA™) which provides risk assessments by analyzing database transactions in real-time. Our highly scalable solution consists of Host and Network Agents that deliver in-depth activity monitoring of databases. The enterprise level platform uses behavioral analytics, and data-centric auditing and protection capabilities to mitigate risk.
